PROFILE

Junior full stack web developer graduated in Computer Science with first class. Knowledge in software development and web focusing on web technologies such as HTML5, CSS, JavaScript, jQuery, Node.js, React.js, comfortable in using CSS frameworks and working with headless CMS like Netlify CMS. Experience in back-end development using Java, .NET core MVC and Node.js as well as web API. Basic knowledge on python and C/C++ which were learned in secondary school.

Initiative-taking and work well in team and deal promptly with issues in a logical and analytical way being them of coding nature, managerial, or a day to day challenge. Helping the people with my applications or projects that I have been involved with is the priority.

Looking for full-time employment with forward thinking employer.
